HOBBIES

WORK EXPERIENCE

Software Engineer

Across 株式会社 2020 Nov - Present

- I develop and maintain internal Java applications for ANA Systems, manage Linux servers for deployment, and configure AWS services to ensure secure access and monitoring. Engage in Agile practices, including sprint planning and CI/CD processes.

Virtusa 2020 Nov - 2023 Mar

- As a Salesforce Developer, I played a key role in developing APEX Classes, Controller Classes, Aura Components, and APEX Triggers to meet diverse functional requirements. Leveraged SOQL and SOSL for efficient data manipulation through platform Database Objects. Followed Agile methodology, utilizing sandboxes for rigorous testing before seamless code migration to the deployment instance.

Trainee Developer

2018 Dec - 2020 Jan

Sri Ads World

- Developed an android app for support services and booking directory.
- Developed a Web Application to manage their customers, client employees.

Freelancer

2016 Mar - Present

- Developed and maintaining 10+ enterprise Desktop and Web Applications for local clients using Java, PHP and SQL.
- Developed 15+ beautiful and responsive websites.
- Designed 10+ unique and best-looking logos for local clients.

EDUCATION

- BSc (Hons) in Information Technology** 2016 to 2020
Sri Lanka Institute of Information Technology (SLIIT)
- GCE Advance Level Examination** 2014
Sri Sumangala Central College
- GCE Ordinary Level Examination** 2011
Sri Sumangala Central College

*All documents are attached with this resume.

PROJECTS

- 2023 Mar – Present • **HRM Solution – All Nippon Airways (ANA Airline)**
- Analyzed, designed, and developed Java applications tailored for ANA Systems' internal use.
 - Managed Linux servers and implemented AWS services to enhance scalability and security.
 - Actively engaged in Agile methodologies, encompassing sprint planning, code reviews, and CI/CD processes.
 - Technologies utilized: Java, Linux, AWS S3, AWS RedShift, GIT
- 2020 Nov – 2023 Mar • **Health Cloud related software – UnitedHealth Group Medical Application.**
- Work as a SFDC Developer in the organization.
 - Developed APEX Classes, Controller Classes, Aura Component and APEX Triggers for various functional needs in the application.
 - Followed the Agile methodology.
 - Technologies used: APEX, LWC, APEX Triggers, SOQL and SOSL, GIT
- 2018 – 2019 • **HelpMe– An android app for support services and booking directory.**
- HelpMe is developed with the aim of promoting small scale businesses in Sri Lanka.
 - Consists of support services directory, job opportunities database with on the go access and booking facility.
 - Technologies used: Android Studio (Java), Firebase
- 2019 (University – Research) • **Techy – Final Year Research Automated Reading Comprehension**
- Sample Answer are automatically generated when a paragraph and relevant questions are given. System predicts the best matching answer from the given paragraph. SQuAD dataset is used to train the dataset.
 - Technologies used: Python, TensorFlow, Spyder, SQuAD dataset
- Aug 2016 – Nov 2016 • **Web application for a School**
- A web-based application for a school where student and teachers' details are managed. Teachers upload the subject materials to the system so that student can download them. This application is a role-based application only reserved information can access to the relevant user.
 - Technologies used: PHP, Java scripts, Bootstrap, My SQL
- Feb 2017 – May 2017 • **POS system for a super market**
- Developed a Point of Sale (POS) System for a super market. It is designed to simplify the routine: track sales, optimize inventory control, speed up the checkout process and improve the business strategy with custom reports.
 - Technologies used: Java, MySQL, JasperReports
- Aug 2017 – Nov 2017 • **Web and android application for Tourism management system**
- By introducing this web application and mobile application everyone gets the opportunity to provide as well as get services easily through online in an instant manner.
 - Technologies used: Asp.net (C#), Angular, MVC Architecture, My SQL, Ionic Framework
- Mar 2017 – July 2018 • **Diving Management System for “Burracude” Diving System**
- Developed a web application and android application. Therefore, everyone gets the opportunity to provide, as well as get services easily through online in an instant manner.
 - Technologies used: Angular, Firebase, Android and other Web Technologies
